MARINE AFFAIRS AND NAVIGATION
CONFERENCE

International Association of Ports and Harbors

***ALTERNATIVE MARITIME POWER (AMP) CONFERENCE
LOS ANGELES HARBOR HOTEL, SAN PEDRO, CA***

**CMANC and IAPH
invite you to attend**

**Alternative Maritime Power
Conference**

SAVE THE DATE

April 24-25, 2006

Providing ocean going vessels with shore power (AMP) was first developed at a cruise terminal in Juneau, Alaska. The technology was introduced at a container terminal at the Port of Los Angeles in May of 2004. Both applications were developed for the purpose of reducing ships impact to air quality. During this AMP conference you will learn about the latest in AMP technology.
